

EXAM RESULTS

Dear Student,

In competitive exams, strong subject knowledge alone is not enough to win the race. Attaining optimal time management, way of approaching different types of questions, handling different difficulty level questions is equally important. Rizee's analysis report is prepared after considering all these factors. Going through this report and understanding all the important details gives you scope to prepare using a systematic and targeted preparation strategy that will help you reach your maximum potential.

Example:

If you are good in easy and moderate questions, but struggling with solving difficult questions, then you need to emphasize more on practicing difficult questions.

If you are spending more time than necessary on statement questions then you have to analyze your approach and practice more to reduce the time taken in answering this type of questions.
